Use case diagram of easy job:

Figure 1 : Use case diagram of Easy Jobs.

This is the use case diagram of Easy jobs. It contains three actors Applicant, Admin and company.

i.   Applicant:

One of the use case of applicant is create profile and it has include relation with another use case upload profile picture as the applicant must upload profile picture during creating profile. Upload CV has extend relation with upload cover letter as the applicant can also upload cover letter along with CV. It is not compulsory for applicant to upload cover letter. Some of the other use case of the applicant are login, search job and apply for jobs.

ii.   Admin:

Use case of admin are login, manage applicant and approve jobs.

iii.   Company:

Upload job has include relation with job information as company has to clearly define the information of the applicant.

Example: One of company of Nepal requires cash officer. It gives the required information of the post such as vacancy, job level, offered salary, education etc.It has also another use case such as download details, select applicant and contact applicant.
